FROM:

Jonathan E. Fielding, M.D., M.P.H. JE helding Mo

Director and Health Officer

SUBJECT:

REPORT ON RAVE MOTION

On July 6, 2010, on a motion by Supervisors Yaroslavsky and Knabe (Attachment 1) the departments of Public Health and Health Services were instructed to convene a task force consisting of appropriate representatives from cities, law enforcement agencies, hospitals, the County's Emergency Medical Services and Public Health Commissions, and community health providers to develop countywide recommendations to enhance the public safety of electronic music festivals (or raves) and similar events. In addition, the motion instructed the task force to consider the feasibility of a public education effort to raise awareness about the potential dangers of rave parties and how participants can protect themselves. Finally, the motion requested that a report with findings and recommendations should be provided to the Board within 120 days.

TASK FORCE

On August 11, 2010, the first task force meeting was convened with representatives (Attachment 2) from the following agencies: the Department of Public Health (DPH), the Department of Health Services (DHS), the Los Angeles Police Department (LAPD), the Los Angeles Fire Department (LAFD), the Los Angeles County Sheriff's Department (LASD), the Coliseum Commission, and numerous representatives from other organizations. Based on discussion at the meeting, the following four workgroups were created: Harm Reduction. Medical Response, Public Education, and Site Safety. Three subcommittees (Capacity, Narcotics & Search, and Communications) were established from the Site Safety Workgroup. DPH facilitated the Harm Reduction and Public Education workgroups. DHS facilitated the Medical Response workgroup and assisted LAPD in the facilitation of the Site Safety Workgroup. A list of preliminary recommendations was established and compiled from each

workgroup. On October 13, 2010, the task force convened to review and comment on draft final recommendations (Attachment 3). Most of these draft recommendations were enforced at the two electronic music festivals at the Sports Arena and Exposition Park that have occurred since the Board directed the formation of the Rave Task Force.

RECENT RAVES

DPH and DHS have been involved in the planning of two electronic music festivals held at the Los Angeles Sports Arena and Exposition Park: the LA Love Festival (held on August 21, 2010) and Monster Massive (held on October 23, 2010). Staff from DPH's Substance Abuse Prevention and Control (SAPC) and from two SAPC community-based providers (San Fernando Valley Partnership, and Asian American Drug Abuse Programs, Inc.) attended both events where they distributed information on the signs and symptoms of ecstasy use, including an ecstasy "harm reduction" card (Attachment 4) targeted towards attendees. DPH worked with members of the electronic music industry to create this card, and has received many positives responses from the public. SAPC staff also briefed security personnel at both events on the signs and symptoms of ecstasy use and overdose and ensured that DPH approved educational and electronic messaging was posted throughout the venue. Staff from DHS's Emergency Medical Services Agency and Medical Alert Center provided medical services support at both events. All agencies involved with the events ensured that the recommendations implemented at the event were appropriate and effective.

Currently, DPH is working with event promoters and electronic music talents to develop a public service announcement (PSA) to highlight the dangers of ecstasy and overdose, collaborating with LAPD in the testing and reporting of seized suspected ecstasy pills from these events, and also abstracting and analyzing data from those attendees that were transported from these events for medical reasons. The PSA will include harm reduction messages by major electronic music talents, including Kaskade and Will.I.Am. DPH will encourage promoters to broadcast the PSA at the event and online through their websites and other relevant social networking sites, and will work to get online ticket outlets to show the PSA at the point of purchase.

Statistics gathered from the LA Love Festival and Monster Massive showed that no deaths resulted from either event, and there were far fewer hospitalizations than reported at the Electric Daisy Carnival. However, it must be taken into consideration that these two events were much smaller in size (5,000 attendees for LA Love Festival and 20,000 attendees for Monster Massive) than the Electric Daisy Carnival (161,000 attendees over two days).

RECOMMENDATIONS

DPH and DHS plans to widely disseminate these recommendations, subject to Board concurrence, to promoters and site sponsors of these electronic music festivals. Over the next 12 months, DPH and DHS will work with promoters and also local law enforcement and public safety agencies to assess compliance with the recommendations at other rave events and identify possible future improvements in safety.

Each Supervisor November 5, 2010 Page 3

We recommend that your Board adopt these recommendations as general policy direction for all electronic music festivals in Los Angeles County within your jurisdiction, and encourage adoption of the recommendations by all promoters and sponsoring entities within Los Angeles County, whether these events take place at public or private venues.

Please let me know if you have any questions or would like additional information.

County Counsel
Executive Officer, Board of Supervisors

PROPOSED FINAL RECOMMENDATIONS FOR ALL FUTURE RAVES AND ELECTRONIC MUSIC EVENTS

Venue Related Recommendations:

- All events to be planned and managed using the Incident Command System (ICS) and the National Incident Management System (NIMS) Model. II, v
- 2. Determine the threat assessment of each event and develop an Event Action Plan (EAP) to address safety, medical and health issues. ii,v
- 3. Complete an after action report following each event.
- 4. Attendance to be limited to individuals 18+ years old, where the venue is responsible for enforcing strict identification and age checks at all entrances to the event (including the use of automated age-checking equipment). i,ii,iii
- Recommend developing a policy to enforce the 18+ age limit and conclude the music performances no later than 02:00 AM at all electronic music festivals in Los Angeles County, including un-incorporated areas.ⁱⁱ
- 6. Limit capacity to approved space requirements determined by the jurisdictional fire departmentⁱⁱ
 - a. Determine occupant loads for stadium/arena areas and open areas
 - b. Assure emergency egress from interior of the event venue i.e., no excess density in interior routes needed for emergency medical and public safety.
- 7. Allowable hours and duration of event: (i,iii)
 - a. Conclude music sets/performances no later than 02:00 AM
 - b. Cease alcohol sales at least 30 minutes before the scheduled conclusion of the last music set/performance (excluding cool down time)
 - c. Allow attendees to remain in the venue for at least 60 minutes after the scheduled conclusion of the event for a cool down/sober up period with soft music, house lights on, and food/non-alcoholic beverages available
- 8. Require appropriate stage protection and security (e.g., concert barricade, standard security compound) as determined by public safety and security personnel.
- Require appropriate perimeter fencing (to prevent fence jumpers and gate crashers, and for the safety of attendees) as determined by public safety personnel.ⁱⁱ
- 10. Require appropriate interior fencing (e.g., to separate General Admission, seating, and VIP areas) as determined by public safety and security personnel.
- 11. Remove (and arrest) any fence jumpers or gate crashers. ii
- 12. Ensure access to safe transportation (e.g., taxicab service or parental pick-up) for attendees leaving the venue due to substance use intoxication or invalid identification. iii

Safety and Law Enforcement Related Recommendations:

- Recommend placing an "amnesty box" (contracted for by the promoter or venue) at locations near admission/entrance for discarding any illegal drugs or weapons."
- 2. Require thorough searches (and wanding) of all individuals and their bags entering the venue to limit illegal narcotics and weapons.ⁱⁱ
- 3. No backpacks or large purses; items attendee may bring limited to a jacket, and a single bag or purse, not to exceed 8" x 8"."
- Recommend law enforcement and searches outside and inside the venue, targeting sales of illegal drugs.ⁱⁱ
- Recommend DUI Sobriety Checkpoints to be conducted and prioritized over ease of exit. Include signage on DUI Checkpoints and/or the importance of identifying a designated driver.ⁱⁱⁱ
- Recommend providing messaging to encourage attendees who are feeling sick or intoxicated (or whose friends are feeling sick or intoxicated) to ask law enforcement or medical staff for help without fear of being arrested.
- 7. Require an appropriate ratio of law enforcement to private security based on the venue and threat assessment of the event.
- 8. Recommend monitoring of Twitter and other relevant social networking sites to maintain awareness of potential threats to safety and health. iii
- Ensure that public safety and medical personnel have compatible communication equipment, including full head gear for all public safety supervisors inside the venue. ii,v
- 10. Establish conditions and a plan where the promoter in conjunction with public safety and medical personnel can announce or play pre-recorded messages on safety or health issues to the attendees. ii,iii,iv

Alcohol Related Recommendations:

- Require use of easily identifiable plastic/vinyl wristbands for those attendees aged 21 and older.^[ii]
- 2. Ensure that the facility and any concessionaires have current and valid ABC licenses, abide by ABC operation conditions, and must petition for a conditional license to add conditions.
- 3. Restrict alcohol consumption to certain locations only (e.g., no alcohol in parking lots unless venue has a special event permit). ii,iii
- Restrict the number of alcohol sales points.

Education Related Recommendations:

- Develop a public service announcement regarding the dangers of drugs and especially ecstasy – that can be viewed by every ticket purchaser and attendee, and is displayed on the event promoter's website. i,iv
- Require promoter's website to display information on the health effects (including symptoms requiring medical aid) of ecstasy and other illegal drugs commonly associated with electronic music events.
- 3. Provide educational/harm reduction materials and information to the attendees at the venue. iii,iv
- Increase the effectiveness and visibility of warnings about illegal drug use outside and inside the facility, electronically and through signage. iiii,iv
- 5. Require event hired private security personnel to undergo training prior to each event regarding the detection of drug use in patrons, identification of drug paraphernalia, and safety procedures for overdose cases.^{i,iii,iv}
- Compile law enforcement, safety, medical, and event related data for analysis and comparison, and complete an after action review (AAR) following the event to address major issues.^{iv,v}
- Coordination between law enforcement/security and Department of Public Health to test seized suspected illegal substances from electronic music events, and present results for educational purposes. iii,iv

Health Related Recommendations:

- 1. To minimize health issues related to weather conditions and possible drug use/misuse, ensure working water fountains and/or free water distribution sites in close proximity to each stage, and require that water and electrolyte beverages/sports drinks are widely available and their locations clearly identified. Use roaming vendors to make water and electrolyte beverages/sports drinks more easily accessible throughout the venue and especially at crowded stages.^{i,iii}
- Require key event staff, vendors and servers to be briefed on signs and symptoms of drug overdose and heat related problems.^{iii,v}
- 3. Recommend that earplugs are available at entrances and/or first aid stations at no-cost. iii

3 | Page 11/4/2010

Emergency Medical Services Related Recommendations:

- Require clearly marked signage in multiple key locations regarding location of easily accessible medical services on site.^{i,v}
- Deploy additional (and easily identifiable) roaming medical teams of paramedics or EMTs throughout the venue as determined by the threat assessment.ⁱ
- 3. Recommend an additional first aid station and/or on-site physician and nurse (to coordinate with the fire department and private ambulance provider in the planning process and during the event), in addition to appropriate event medical support (so that problems not requiring hospital emergency care are attended to and participants are provided appropriate treatment/support) as determined by the threat assessment.^{i,v}
- Ensure early notification of events to the Emergency Medical Services (EMS) Agency, Medical Alert Center (MAC), and local hospitals.
- The Department of Health Services will develop a pre-hospital policy addressing electronic music festivals and the interface with Emergency Medical Services.

Recommendations to the Board of Supervisors:

- The Board of Supervisors will adopt the above recommendations as general
 policy direction for all electronic music festivals in Los Angeles County within
 their jurisdiction, whether these events take place at private or public venues.
- The Board of Supervisors will encourage adoption of the above recommendations by all promoters and sponsoring entities within Los Angeles County, whether these events take place at private or public venues.

Recommendations from the Coliseum Commission

[&]quot;Recommendations from the Site Safety Workgroup

[&]quot;Recommendations from the Harm Reduction Workgroup

ivRecommendations from the Public Education Workgroup

^vRecommendations from the Medical Response Workgroup

Last weekend's Electric Daisy Carnival at Exposition Park and Memorial

Coliseum sent numerous youths and adults to hospital emergency departments,

primarily to be treated for drug intoxication. Tragically, one teenager who reportedly

attended the event died from an apparent drug overdose.

Musical events like the Electric Daisy Carnival, commonly known as "raves," tend to be held over a long periods of time - sometimes days — in large venues on both public and private property. While the Coliseum Commission has taken steps to temporarily stop these events from being held on its property, the County must work with other key community stakeholders to look to the larger public health risks posed by raves and other similar events, regardless of whether they are held at public or private venues. Issues to be considered include educating potential ravers about how to avoid risks if they choose to attend these events, and/or restricting the location, hours, size and manner in which these events can legally be held.

WE, THEREFORE, MOVE that the Board of Supervisors instruct the

Departments of Health Services and Public Health to convene a task force consisting of appropriate representatives from local cities, law enforcement agencies, hospitals, the

MOTION

County's Emergency Medical Services and Public Health Commissions, and community health providers to identify the extent of the public health concerns associated with rave parties. The task force should develop countywide recommendations to enhance rave safety by mandating that rave promoters and sponsors incorporate public health recommendations into their event planning, for example by requiring the use of private emergency medical staff. The task force should also consider the feasibility of a public education effort to raise awareness about the potential dangers of rave parties and how participants can protect themselves. The task force should provide a report to the Board with its findings and recommendations within 120 days.

Think it through and KNOW THE FACTS so you and your friends can make INFORMED **DECISIONS** and **STAY SAFE** together.

MENT IS EXSTREME

Ecstasy (E, X, XTC, rolls, thizz) is an illegal synthetic amphetamine (stimulant). Ecstasy pills usually contain 80-125 mg of MDMA, but can vary widely in strength and purity (from 0-180 mg of MDMA). Since ecstasy is not regulated, and is often cut with other substances or more dangerous drugs, you can never be sure what you're really getting.

Comment and a second second

- ightarrow Effects felt within 20-40 minutes, peak within 1-1 ½ hours, and subside after 3-5 hours and may include elevated mood and energy, enhanced sensations, and a sense of emotional connectedness.
- Ecstasy also increases heart rate, blood pressure, body temperature, and muscle tension (like teeth grinding).
- After-effects (week or longer) can include depression, anxiety, irritability, muscle fatigue, insomnia, and difficulty concentrating,
- It may take your body several weeks or more to completely recuperate.
- Most medical emergencies or deaths are from heart problems or complications from hyperthermia (increased body temperature) and hyponatremia lelectrolyte imbalance from drinking too much water too fast
- Repeated or high-dose use (stacking) can have long-term consequences, including impaired memory, and brain or liver damage.
- Escalating use to re-experience the same effect may mean you're developing tolerance or becoming addicted

HOW TO MINIMIZE POTENTIAL HARMS

- Take frequent breaks Let your body cool and rest.
- Stay hydrated Sip or take small gulps of water [to help cool your body) and non-caffeinated sports-drinks like Gatorade (to replenish electrolytes). Alcohol and caffeine dehydrates the body.
- Don't mix Taking ecstasy with other substances (especially alcohol or other stimulants) can increase the risks, and lead to potentially dangerous interactions.
- Recognize overdoses Signs include extreme headaches, nausea, confusion, blurred vision, inability to talk, racing heart, vomiting, fainting, muscle tremors, and convulsions. Seek medical help if you or your friends experience even just one sign.
- Keep an eye on your friends stay together.
- Don't drive Ecstasy affects physical and mental functioning (like) vision, reaction time, and judgment).
- Aim low (dose AND frequency) Ecstasy risks increase with larger doses (stacking) and re-dosing when you start to come down.
- Stay away The only way to completely avoid the risks is to avoid the drug, enjoy the music and dancing instead.
- Educate yourself & your friends The best decision is a well-informed one
